Constructing Health: How the Built Environment Enhances Your Mind's Health

Friday 23th October 2026 h 19:30

Sala delle Grida - Ex Palazzo della Borsa
Via XX Settembre, 44 - Genova

Through research in neuroscience and architecture, Tye Farrow will explore how our mind interacts with our built environment to enhance our health and well-being.

Tye S. Farrow

Senior Partner, Farrow Partners Architects
FRAIC, B.Arch., M.Arch.U.D., M.Neuro.Appl.Arch.Des.,
Dr.PH (Student), OAA, MAIBC, AIA Assoc, LEED AP

Working at the intersection of architecture and neuroscience, Tye is a world-recognized pioneer in tackling how our built environments either give or cause health. The first Canadian architect to earn a Master of Neuroscience Applied to Architecture, he is a much sought-after speaker, having presented to respected organizations in over sixty-five cities on six continents.

In his first, best selling book, published by University of Toronto Press, titled *Constructing Health: How the Built Environment Enhances Your Mind's Health*, Tye explores the relationship between placemaking, mind health, and human performance, at the intersection of neuroscience and architecture.

Program:

h 19:30

Institutional greetings by Luca Rocco Casareto dal Verme Clemson University
Greetings from the Ordine and Fondazione degli Architetti Pianificatori Paesaggisti e Conservatori di Genova
